Faded Blue

Faded Blue

The above two pics are of the same bird. It is a Faded Black. The top picture is the juvenile feather, the bottom is the adult plumage.

The following pics are a wonderful illustration of the drastic change that occurs from squeaker to adult plumage in a Faded Black cock bird. The pics are in order based on the age of the bird to show the change as it happened. All pictures are of the same bird.

Many thanks to Steve Ceasar for the pics.

Bronze Catalonian Tumbler

Pied or piebald

Magpie Marked

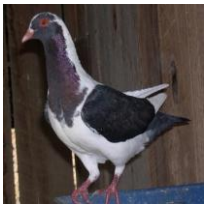
Magpie marked birds show white heads and wings and are sometimes mistakenly called Saddles.

Whiteside

Whitesides are a colored bird with solid white wing shields.

Baldhead

True Baldheads should show a white head, white flights, and a white tail with the rest of the bird colored.



Hungarian Marked

Hungarian marked birds have their own distinct markings as shown in the picture above.

Bodymark

Bodymarks are a solid colored bird with a pure white tail. The opposite is Tailmakr which is a solid white bird with a colored tail.

Saddle Marked

Saddle marked birds are a solid white bird with colored wing shields. They are the opposite of Whiteside.

Saddle Marked
Voorburg Shield Croppers and other shield marked breeds are the same as Saddles.

Bellneck
Bellneck is a form of Pied where the bird is almost entirely white with just a patch on the back of the neck that is colored. Bellnecks get their name from this markig which resebles a bell shape patch of color.

Heavy Pied
This is a good example of a non classified Pied marked bird.

Badge Marked
Badge marked birds have a big range of possibilities, but are generally regarded as birds with any white in the head that is not Baldhead or Beard Marked.

Ringneck Doves

Tangerine

Tangerine Pearl

This is actually Homozygous Tangerine, regardless of what it's bred to or the sex, will produce 100% Tangerines of some kind.

Orange Pearl (Dilute Homozygous Tangerine)

Wild Type

Blond or Fawn (Dilute Wild Type)

Rosy

Peach (Dilute Rosy)

Mosaic

An extremely rare mutation same as Mosaic in Pigeons.

White

True White Doves show some slight cream coloring on the undersides of the tail and may show a slightly darker neck ring. They also have orange eyes.

Wild Pied

Fawn or Blond Pied

Bulleyed White

BEW's are simply Pied birds that show no colored feathers. These birds have a dark beak and dark eyes. These are also pure white with no blemishes or discoloring.

Albino

These are true Albinos with snow white plumage and pink eyes.

Dark Frosty

Frosty's always show a grizzling effect in the flights where normal colored birds do not. This bird is a combination od Wild and Frosty.

Blond or Light Frosty

This is a combination of Fawn or Blond, and Frosty.

Violet-Neck
A combination of Frosty and Tangerine Pearl.

Orange-Neck
A combination of Frosty and Orange Pearl.

Ash
A combination of Frosty and Tangerine.

Ash Pearl
Same as Ash, but showing a variation of pearling effect.

Roan
A combination of Frosty and Rosy.

Sunkist
A combination of Frosty and Peach.

Pink
A subtle combination of Tangerine and White.

Dark Ivory
A combination of Ivory and Wild.

Apricot
A combination of Ivory and Tangerine.

Ivory
Sometimes called Show Ivory. A combination of Fawn or Blond and Ivory.

Cream
A combination of Ivory and Rosy.

Cream Pied
A combination of Ivory, Pied, and Rosy.

Platinum
A combination of Ivory, Frosty, and Tangerine.

Silver Ivory
A combination of Ivory, Frosty, and Wild.
